Abstracts

Global Education ERP Market is valued approximately at USD 10.68 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 14.8% over the forecast period 2021-2027. Education ERP is a software which provides complete control over all the activities performed in educational institutions. The global education ERP market is being driven by need of automated management to carry out business processes in academic institutions and it will enhance the performance of administrative modules, thereby advancements in eLearning platforms and technology. Furthermore, the growing integration of learning management systems and enterprise resource planning and increasing the need for managing academic processes will provide new opportunities for the global education ERP industry. For instance, according to the world economic forum, the outbreak of covid-19 has resulted in shutting down of schools and educational institution and over 1.2 billion children in 186 country are out of classrooms due to which the need of e-learning by the help of various technology has come into highlight whereby teaching is done remotely and on digital platforms by the use of software technologies. As a result, the rising concerns of covid-19 cases will necessitate the education ERP in the education systems of different institutions, which will serve as a catalyst for the education ERP industry in the future. However, the availability of
