Global Electric Dental Handpieces Market is valued approximately USD xx billion in 2020 and is anticipated to grow with a healthy growth rate of more than xx % over the forecast period 2021-2027. When executing current restorative and endodontic procedures, dentists use electric dental handpieces to help them maintain a balance of command and control. These devices have a high torque rating and enable precise, vibration-free precision cutting. Air turbine-powered handpiece motors are replaced by these technologically superior gadgets. The market is being driven by an increase in the number of dental clinics, as well as an increase in the incidence of dental problems.
