Abstracts

Global Electric Scooter Lift & Carrier Market is valued approximately at USD XX Million in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Electric Scooter Lift & Carrier is the equipment that helps physically impaired people in carrying their electric scooter or wheelchair with them while travelling long distances. This equipment can be placed inside or outside the vehicles such as car, truck and van. Rising demand for electric scooters and convenience in carrying scooters are the factors creating demand for electric scooter lift and carrier. Also, government initiative to make electric scooters affordable to increase their adoption are fueling demand for lift and carriers. Such as, in 2021, in India, Hero reduced prices of its electric scooters in the range of 12% to 33%, owing to increased incentive by government through the Faster Adoption and Manufacturing of Hybrid and Electric (FAME) vehicle scheme. Furthermore, new product and service launches and technological advancements such as advancements in hydraulics are expected to create lucrative demand during forecast period. In October 2018, Harmar Mobility LLC introduced liftsquad installation support network to its service portfolio. However, lack of charging infrastructure in developing countries and high product cost are poised to hamper demand in near future.

North America is dominating the global market in terms of revenue among Asia Pacific, North America, Europe, Latin America, and Rest of the World, owing to presence of prominent manufacturers that are producing products according to the government regulations. Whereas, Asia Pacific is expected to grow with the significant growth rate during forecast period, due to growing demand for electric two-wheelers in the region complemented by government subsidies.
