Global Electric Sub-Meter Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX over the forecast period 2021-2027.

Electric Sub-Meter is a device which monitors the usage of electricity and also allows to measure the energy consumption.

Increasing demand for smart electric sub-meters as nowadays, the requirement has increased for monitoring, reducing, controlling and managing the proper usage of electricity and growing need to achieve energy efficiency is driving the market.

In November 2020, Kamstrup and Goteborg Energy signed a partnership with each other for launching a smart metering solution. The partnership was basically meant for replacing around 275,000 electricity meters with new intelligent meters with the enhanced technology in Sweden. Furthermore, in the same year, Kamstrup announced a strategic partnership with advanced metering to enable an easy transition from old to new intelligent metering generation. In September 2020, Schneider Electric introduced an new equipment that is expected to help electricity distribution to fix grid faults, in Nigeria and also restoring power after disruption in less than a minute.

Requirement of high investment in installation as well as lack of awareness among the users about efficient management of energy is hindering the market. However, rising demand for electric sub-meters from various industrial sectors and rising technological development in electric sub meter will result in growth of market in forthcoming period.

The regional analysis of Global Electric Sub-Meter Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North American region has the leading electric sub-meter market. Increasing importance of energy management solutions is the main factor contributing to the growth of market in North America. Also, Asia Pacific region's sub-meter market is growing at a fast rate owing to the escalating industrial and commercial sectors and increased adoption of sub-meters for the tenant billing and energy management.
