Global Electric Vehicle (EV) Battery Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. An electric vehicle battery is a rechargeable battery that helps to power the electric motors of a battery electric vehicle or hybrid electric vehicle. Generally, lithium-ion batteries are designed for high electric charge capacity. The surging demand for electric vehicles, rising advancements in battery technology, and availability of favorable government policies and regulations act as catalyzing factors for market growth around the world.

According to Statista, the total production of hybrid electric vehicles worldwide is recorded at 2.9 million vehicles in 2020, which is projected to grow and is likely to reach 5.4 million vehicles by the year 2025. Thereby, the rising adoption of a hybrid electric vehicle is fueling the demand for Electric Vehicle (EV) batteries, which is accelerating the market growth. The growing electric micromobility and the introduction of battery-as-a-service (BaaS) models are creating various lucrative opportunities for market growth over the forecasting years. However, the unavailability of charging infrastructure and high initial investments and high cost of electricity is restricting market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Electric Vehicle (EV) Battery Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World.
