## **Abstracts**

Global Electric Vehicle Charging Cables Market is valued approximately at USD 260 million in 2020 and is anticipated to grow with a healthy growth rate of more than 25.4% over the forecast period 2021-2027. Electric vehicle charging cables are used in all conductive charging systems- be it at home, on the road or in the garage for quick charging of vehicles. Government initiatives for encouraging people to buy electric vehicles and rising demand for fast charging cables are driving the growth of the market positively. For instance, according to India Brand Equity Foundation (IBEF) report of 2019, government of India in the union budget announced income tax rebates of up to Rs 1.5 lakh (US\$ 0.002085 million) to customers on interest paid on loans to buy electric vehicles, with a total exemption benefit of Rs 2.5 lakh (US\$ 0.003475 million) over the entire loan period. Furthermore, technological advancements in electric vehicle charging cables are expected to grow the market in coming years. However, development of wireless electric vehicle charging is anticipated to restraint the growth during forecast period.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Electric Vehicle Charging Cables

Market. Asia Pacific is the dominating region across the world in terms of market share due to countries such as China, Japan and South Korea which are largest manufacturer and user of electric vehicle in the world.
