Abstracts

Global Electric Vehicle Infotainment Market is valued at approximately USD 1.17 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 38.1 % over the forecast period 2022-2028. The term “EV infotainment” refers to a system that provides entertainment and information to the driver and passengers while in the vehicle. Hands-free phone connections, navigational facilities, vehicle voice control, internet access, two-way messaging tools, and other security features are all included in the device, which includes touchscreens, audio/video (A/V) interfaces, keypads, and other components. The rising demand for fuel efficiency and enhanced electronic circuit efficiency in automobiles have led to the adoption of Electric Vehicle Infotainment across the forecast period. For Instance: as per the India Brand Equity Foundation in 2022, the worldwide electric vehicle (EV) market is rapidly evolving. According to EV volumes, the global percentage of electric vehicles (including battery electric vehicles [BEVs] and plug-in hybrid electric vehicles [PHEVs]) increased to 8.3 percent in 2021, up from 4.2 percent in 2020, with 6.75 million vehicles on the road. As of 2020, this is a 108 percent gain. Electric vehicles (EVs) are gaining popularity around the world because they help to minimise pollution and natural resource depletion. The Indian EV market is also growing quickly, with about 0.32 million vehicles sold in 2021, up 168 percent year on year. Also, the increasing use of wireless technology and increasing adoption of electric vehicles (EVs) by consumers for personal and commercial use are likely to increase the market growth during the forecast period. However, power

consumption is high which may impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Electric Vehicle Infotainment market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share. The rising demand for fuel efficiency and enhanced electronic circuit efficiency in automobiles have led to the adoption of Electric Vehicle Infotainment. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as increasing use of wireless technology and increasing adoption of electric vehicles (EVs) by consumers for personal and commercial use would create lucrative growth prospects for the Electric Vehicle Infotainment market across Asia-Pacific region.
