Global Electrically Conductive Adhesives Market is valued approximately at USD 2839.62 Million in 2022 and is anticipated to grow with a growth rate of more than 8.48% over the forecast period 2023-2030. An electrically conductive adhesive is a glue that is primarily used for electronics. This conductive component is suspended in a sticky component that holds the electrically conductive adhesive together. The Electrically Conductive Adhesives market is expanding because of factors such as increasing need for electronic device and increasing application in healthcare sector to propel market growth. However, its importance has progressively increased during the last few decades.

According to Statista in 2021, Nearly 15 billion mobile devices are in use worldwide, up from slightly over 14 billion the year before. The number of mobile devices is expected to reach 18.22 billion by 2025, an increase of 4.2 billion devices compared to 2020 levels. Another important factor driving is increasing application in healthcare sector. According to the Statista in 2023, it is anticipated that the Health Care segment's revenue would be USD60.72 billion. with a 2023 market volume estimated at USD19,940.00million. By 2027, 1.57 billion people are anticipated in the health care

segment . In addition, the emergence of public charging infrastructures and Growing application of electrically conductive adhesives from electric vehicle application is expected to provide significant growth opportunities. However, Government intervention due to strict regulation in global trade and strict guidelines regarding the use of electrically conductive adhesive stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Electrically Conductive Adhesives Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. Asia Pacific is expected to dominate the global electrically conductive adhesives market in 2020, over the forecast period owing to the growing demand of electronic industry and increasing demand for mobile handsets, computing devices and audio & video gaming products. According to the statista in 2020, the consumer electronics market in the Asia-Pacific region has a value of 257 billion US dollars. North America is fastest growth in the market owing to the strong presence of solar power industry in the region and due to the rapid industrial development, such as electronics and automotive industry.
