## **Abstracts**

Global Electrochromic Glass Market is valued approximately USD 2.1 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 12.27% over the forecast period 2019-2026. Electrochromic glass also known as dynamic glass, is an electronically tinted glass used for windows, skylights, facades and curtain walls. It is a combination of chromogenic material that reacts to light and temperature and change over its transparency consequently, when exterior voltage is employed. Electrochromic glass, which can be directly regulated by building residents, is popular for its capability to enhance occupant comfort, increase access to daylight and outdoor views, decrease energy costs and provide architects with more design freedom. Increasing demand of luxury Cars coupled with need of obligations and rules set by the Government are key driving forces of the market growth. Apart from this, increasing demand for energy efficient products is expected to create significant growth opportunity in the market over the forecast period. However, lack of awareness and high cost impedes the growth of the market over the forecast period of 2019-2026.

The regional analysis of global Electrochromic Glass market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the increasing demand of glasses in architecture.
