## **Abstracts**

Global Electrode ionization Market is valued approximately at USD 778 million in 2018 and is anticipated to grow with a growth rate of more than 6.30% over the forecast period 2019-2026.

Electrode ionization is a technology of water treatment that is widely used for obtaining ultrapure water. In electrode ionization technology ultrapure water is obtained by removing impurities and dissolved salt from normal water. Electrode ionization technology is differed from other technologies for obtaining ultrapure water as it is a chemical free process that does not require acids for purification. Growing demand for ultrapure water from different end use industries such as pharmaceuticals, power generation, electronics & Semi-conductor and other is one of the key driving factors of the market growth. Semiconductor chips used in different devices such as cell phones, computer and automobiles require ultrapure water in every step of manufacturing. Thus, growth in semiconductor industry is fueling the demand for electrode ionization for water treatment. Further, growing industrialization and increasing generation of wastewater are further contributing towards market growth. Moreover, chemical free process coupled with increasing demand for energy efficient advanced water systems is expected to create significant growth opportunity in the market over the forecast period. However, availability of alternative technologies coupled with high installation systems is expected to hamper the market growth.

The regional analysis of global Electrode ionization market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the

World. North America is the leading/significant region across the world in terms of market share owing to growth in different end use industries. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026. Factors such as growing FDI investments in pharmaceuticals, power generation and electronics & semiconductor industries would create lucrative growth prospects for the Electrode ionization market across Asia-Pacific region.
