## **Abstracts**

Global Electrosurgery Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Electrosurgery is a surgical procedure that is used in surgery to control bleeding and to quickly dissect soft tissue. This technique aids in making precise cuts with limited blood loss. Factors such as the growing prevalence of chronic diseases, increasing demand for minimally invasive surgical procedures, coupled with the rising inclination towards outpatient surgeries are the primary factors burgeoning the market demand across the globe. According to Statista, the minimally invasive surgery market worldwide accounted for nearly USD 20.5 billion in 2019. Also, the amount is projected to grow and is likely to reach around USD 44.04 billion by 2030. Therefore, the growing preference for minimally invasive surgery is augmenting the growth of the global market. However, several risks associated with electrosurgical procedures and the increasing number of stringent regulatory frameworks impede the growth of the market over the forecast period of 2022-2028. Also, the flourishing growth of the healthcare sector and increase in the number of cosmetic and bariatric procedures are anticipated to act as catalyzing factors for the market demand during the forecast

period.

The key regions considered for the global Electrosurgery Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing demand for minimally invasive procedures and rising technological advancements in electrosurgical instruments. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the increasing incidences of chronic diseases, and growing number of hospitals, clinics, and ambulatory surgical centers, would create lucrative growth prospects for the Electrosurgery Market across the Asia-Pacific region.
