Global Embedded Display Market is valued approximately at USD 16.4 billion in 2019 and is anticipated to grow with a growth rate of more than 6.9% over the forecast period 2020-2027. Embedded system is a computer-based system that consists of mechanical parts and hardware, also based on pixels per inch, which helps in providing high-resolution images. It is used to execute a color display interface that provides various features like an embedded functionality, smart graphic user interface, and touch screen. Further it has the capability of saving power with greater efficiency and provide flexibility. The rising advancements in embedded display interface technologies such as high-end displays entering the market, growing adoption of automation in different industries and increased demand for interactive displays and digital signage has contributed to the growth of the embedded displays market. Moreover, there is an

increased usage of embedded display in the 3D systems and rising demand from end use applications such as Automotive, industrial automation, fitness equipment, consumer electronics and wearables are the few factors responsible for growth of the market over the forecast period. For instance: As per Statista, the global shipment units of virtual Reality (VR) headset was 7 million and Augmented Reality (AR) headset 0.6 million in 2019 and is anticipated to rise 36.7 million units of virtual Reality (VR) headset and 31.9 million units of augmented reality headset in 2023. Also, the rising usage of fitness tracker device and other wearables creates lucrative demand of Embedded Display market over the forecast period. However, threat of security breaches in embedded hardware and complexities involved in development of embedded software is the major factor restraining the growth of global Embedded Display market during the forecast period.

The regional analysis of global Embedded Display market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world owing to the increased demand for automating manufacturing and assembling, as well as supply chain operations in various industries. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
