Abstracts

Global Emergency Eyewash Market valued approximately USD 2.6 billion in 2016 is anticipated to grow with a healthy growth rate of more than 8.3% over the forecast period 2017-2025. Increasing industrialization is a major factor expected to drive the growth of the safety and eyewash shower market over the forecast period. Due to the many norms set by governments against toxic materials, every work place is now under the obligation of installing safety and eyewash showers. This will drive the growth of the safety and eyewash shower market in recent future. These days, safety and eyewash showers are highly preferred over quaint safety measures and technologies, such as face shields, goggles, etc. Combination shower and eyewash units are generally preferred in industries where workers run the risk of coming in direct contact of chemicals or any other hazardous material to body, facial area and eye.
