Abstracts

Global EMV Smart Cards Market is valued at approximately USD 5.8 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 9.7% over the forecast period 2022-2029. EMV Smart Card refers to a payment card (debit or credit card) with a smart chip. EMV stands for Europay, MasterCard, and Visa, security technology used globally for all payments done with credit, debit, and prepaid EMV smart cards. These cards store data on integrated circuits and also in magnetic stripes. Smart cards include cards that are physically inserted into a reader and contactless cards that can be used from a short distance using radio-frequency identification (RFID) technology. Rising cashless transactions worldwide and growing geriatric population as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to Statista – as of 2022, the total transaction value in the Digital Payments segment is estimated at USD 8490 billion, and the total transaction value witness a CAGR of 12.31% between 2022 & 2027 to reach USD 15170 billion by 2027. Also, rising digitization in banking sector in developing regions and growing emergence of blockchain technology would create lucrative growth prospects for the market over the forecast period. However, high initial investment and rising concerns over data theft and privacy impede the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global EMV Smart Cards Market study include Asia

Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share owing to presence of key market players as well as availability of required technological infrastructure in the region. Whereas, Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as rising adoption of contactless payment cards as well as increasing penetration of leading market players in the region.

Major market players included in this report are:
American Express
CardLogix Corporation
CPI Card Group Inc.
Equinox Payments
Giesecke + Devrient GmBH
HID Global Corporation
IDEMIA

Recent Developments in the Market:

Infineon Technologies AG JPMorgan Chase & Co.

NCR Corporation

In January 2021, IDEMIA entered into a four-year agreement with Jyske Bank to jointly launch the first recycled plastic payment card in Denmark.

In April 2022, IDEX Biometrics ASA announced its collaboration with smart card technology company E-Kart for the commercialization of biometric payment solutions in Eastern Europe. Furthermore, both the players would be working towards expansion of biometric smart cards across Europe.
