Global Encapsulated Resistors Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Encapsulated Resistor refers to a two-terminal electrical part that completes electrical restriction as a circuit segment. In electronic circuits, resistors are utilized for various applications including diminishing current stream, adjustment of signal levels. These resistors are designed to meet mechanical shock and vibration requirements. The increasing expansion of robotic industry and growing application of resistors in electronic gadget circuits as well as strategic initiatives from leading market players are key factors accelerating the market growth.

The rising expansion of robotic industry worldwide contributes to the growth of the Global Encapsulated Resistors Market. For instance, according to Statista – in 2021, the global market for industrial robots was valued at USD 43.8 billion, and the market is projected to grow to USD 70.6 billion by 2028. Moreover, in robotics industry encapsulated resistors are used to resist the flow of electric current and are also used in electric gadgets such as smartphones, electronic appliances among others. Also, increasing demand for consumer electronics and rising investment in renewable energy sources would create lucrative growth prospectus for the market over the forecast period. However, growing preference toward high inductors and capacitance impedes the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Encapsulated Resistors Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region in terms of market share due to factors such as presence of leading market players and growing expansion of robotics industry in the region. Whereas Asia Pacific is estimated as the fastest growing region during the forecast period, owing to factors such as rising number of expansion activities by leading market players as well as increasing investment in renewable energy sources coupled with increasing penetration of smartphones in the region.
