For this the Endoscopy Washer Disinfectors are used which rinses the devices with strong disinfectors. The demand for endoscopy washer disinfectors is swelling with the growing focus towards the scattering infections due to contamination. Endoscope washer disinfectors are also obtainable in the market with dual basin system. Multiple basin washer disinfectors make it easily handy for the individual and connected endoscopes. The market growth is primarily driven by rising incidence of infectious disorders because of contamination. As per the Centers for Disease Control (CDC) the healthcare-associated infections (HAI) account for 1.7 million infections and 99,000 deaths per year in America, of these 22% are surgical site infections and 15% are lung infections. Further, Rise in adoption of endoscopes and visualization systems in healthcare settings owing to the increasing prevalence of gastrointestinal, urological and gynecological disorders fuels the market growth. As per International Agency for Research on Cancer, in 2018, global cancer burden is anticipated to increase to 22 million by 2034. However, high cost associated with the endoscope washer disinfectors may hamper the growth of the market over the forecast period of 2020-2027.
