## **Abstracts**

Global Endotracheal Tube Market is valued approximately at USD 1.9 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.2% over the forecast period 2021-2027. The endotracheal tube is a small tube, which is inserted into trachea through mouth or nose in order to maintain unobstructed passageway especially for delivering oxygen or anesthesia to lung. The global Endotracheal Tube market is being driven by increasing geriatric population, rise in number of surgical procedures and increase in prevalence of respiratory diseases. Furthermore, growth new innovations and technological advancement, will provide new opportunities for the global Endotracheal Tube industry.
