## Abstracts

Global Energy retrofit system Market is valued approximately at USD 142.88 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 4.5% over the forecast period 2021-2027. . The retrofitting of these systems leads to substantial reduction in energy costs for homes and offices. The global Energy retrofit system market is being driven by growing energy consumption and need for improved energy efficiency. Furthermore, regulatory mandates and incentive programs, will provide new opportunities for the global Energy retrofit system industry. For instance, according to international European agency, the electricity consumption increased by 50% between 2018 to 2050. As a result, increased in energy consumption will serve as a catalyst for the Energy retrofit system industry in the future. However, longer payback period and hidden costs, may impede market growth over the forecast period of 2021-2027.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are the key region considered for the regional analysis of Energy Retrofit Systems market. The rising consumption of energy and growing concern about the GHG emission and government regulation to decrease carbon footprint. makes Europe the leading region across the world in terms of market share.
