## **Abstracts**

Global Engineering Services Outsourcing Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Engineering services outsourcing is a process of hiring various non-physical engineering functions, such as prototyping, designing, system integration & testing, and computer-aided manufacturing from an external source. This service is essential at the early stages of the product design and development process and uses many information-technology (IT)-based tools and databases. The rising demand for automation and adoption of integrated solutions, growing adoption of cloud-based engineering software, coupled with the increasing initiatives by the key market players are excelling the market demand across the globe. For instance, in August 2021, Symphony Health and PRA Health Sciences' data solutions division extended its data assistance worldwide by striking a pact with international sales audits and medical prescription vendors. Thereby, the rising number of strategic actions by the chief market vendors are accelerating the market growth in the impending years. However, a dearth of skilled professionals and high license and maintenance costs impede the growth of the market over the forecast period of 2022-2028. Also, the rising acceptance of cloud computing and substantial development of the emerging markets are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Engineering Services Outsourcing Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to the rising acceptance of the novel technologies and availability of cost-effective hiring assistance supplied by highly proficient engineering professionals. Whereas, Rest of the world is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the increasing investments in research and development activities, and economic development, would create lucrative growth prospects for the Engineering Services Outsourcing Market across the region.
