Environmental disinfection robot is more improve system for cleaning the area with zero risk of harm to individuals. Technology are enhancing over the time to minimize the hazard of communicable infection in several public places and also in research place where numerous health-related products are developed. Presently, various healthcare organization and research institutes have started utilizing portable improved environmental disinfection robots that attributes ultraviolet-C (UV-C) light or hydrogen peroxide vapor (HPV) to accompaniment infection control protocols in place to battle hospital-acquired methicillin-resistant staphylococcus aureus, clostridium difficile and other multi-drug-resistant organisms. Rising incidences of communication diseases and healthcare-associated infections (HAIs), increasing R&D spending in the field of healthcare robotics and growing geriatric population are the few factors responsible for high CAGR of the market over the forecast period. For instance, according to the U.S. Centers for Disease Control and Prevention (CDC), a survey of acute care hospitals found 1 in 25 hospital patients has at least 1 HAI on any given day and that 75,000 deaths per year are due to HAIs. This, in turn, is expected to accelerate the demand of environmental disinfection robots around the world. Moreover, in the recent COVID-19 crisis, the demand for sanitizing and disinfecting, as a preventive measure for Covid-19 crisis is growing globally, which has resulted in the rise in demand for environmental disinfection robots in the developed countries. However, high costing of disinfection and dearth of product availability are the major factor

expected to limit the market growth during the forecast period of 2020-2027.

The regional analysis of global Environmental Disinfection Robots market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the growing focus on comfort & safety in hospitals, along with the early acceptance of modern technology in the region. However, Europe is anticipated to exhibit highest growth rate / CAGR over the forecast period of 2020-2027, due to rising acceptance of advanced technology to improve the healthcare system and prevent the hazard of infection in the hospital across the region.
