Abstracts

Global Environmental Remediation Market is valued approximately at USD 96.2 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 8.7% over the forecast period 2021-2027. Environmental Remediation refers to the process of removal of pollutants and contaminants from environmental components such as soil and groundwater in order to protect the environment. Rapid industrialization and population growth has caused an urgent need for environmental remediation and as a result, initiatives by governments and key market players and are expected to boost the market growth. And as more advanced remediation technologies are developed, new opportunities are likely to open up for the market. However, decreased demand

from the oil and gas industry because of COVID-19 is expected to hinder the market growth.

The regional analysis of global environmental remediation market is based on key regions including Asia Pacific North America, Latin America, Europe and the rest of the world. North America dominated the market in 2020 in terms of share and is also expected to exhibit the highest CAGR over the forecast period. This growth can be attributed to the presence of major companies and growing adoption of environmental solutions in the region.
