Abstracts

Global Epoxy Curing Agent Market is valued at approximately USD 4.4 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 6.84 % over the forecast period 2021-2027. Epoxy curing agents cure epoxy resins by interacting with the epoxide groups or by catalytically increasing the self-polymerization of the epoxy group. Epoxy resins are widely utilized in the production of adhesives, sealants, paints, and varnishes, as well as composites. The usage of lightweight materials in many industrial sectors, such as aerospace and automotive, is bolstered by strict regulatory regulations and quality standards. Furthermore, epoxy curing agents are in high demand for the production of printed circuit boards (PCBs), which are widely utilized in a wide range of electronic products, including mobile phones, smartphones, automotive electronics, industrial, and other consumer electronics. As a result, rising demand for epoxy curing agents as a lightweight raw material in a variety of industrial applications will continue to have a substantial impact on market dynamics in the coming years. Top players of the market are taking strategic initiatives to expand their presence in the market. For instance,

? In January 2021, Audax Private Equity sold Gabriel Performance Products to Huntsman International LLC, a specialized chemical manufacturer of specialty additives and epoxy curing agents for paints, adhesives, and other applications.

? In April 2018, Hexion Inc., a chemical business based in the United States, has introduced EPI-REZ™ Resin 7720-W-50, a new high-performance epoxy dispersion

resin. When combined with the company's EPIKURE™ epoxy curing agent 6870-W-53, the new EPI-REZ™ Resin's performance characteristics, such as excellent corrosion resistance, superior adhesion to metal or concrete, and ease of formulation, are comparable to solvent-borne systems at >50 grams/liter of volatile organic compounds (VOCs).

However, Environmental Regulation in European Countries may impede the market growth over the forecast years.

The regional analysis of the global Epoxy Curing Agent Market is segmented for the key regions such as North America, Europe, Asia Pacific, Latin America, and Rest of the World (ROW). Asia Pacific is the dominating region across the world in terms of market share due to rising construction industry in the region. Whereas North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to the rapid rise of household income levels across APAC.
