Abstracts

Global Equity Management Software Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028.

The Equity Management Software refers to software solutions utilized to streamline and centralize the entire investment cycle, optimize processes, and enhance data and reporting. These software solutions used for tracking and management of time-consuming processes involved with issuing equity, maintaining compliance, receiving 409A valuations. The rising growth of equity investments and increasing adoption from Large and Medium-sized Enterprises as well as Strategic initiatives from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in December 2020, the total value of funds raised through private equity and venture capital deals in India was estimated at USD 2.37 billion, and this number is further increased to USD 3.04 billion in January 2022. Furthermore, leading market players are coming up with new innovative solutions to capitalize the growing adoption of Equity Management Software. For instance, in July 2021, Massachusetts, USA based Fidelity Investment in partnership with Massachusetts, USA based Shoobx, a capitalization table management provider, launched an equity management solution for private companies. This new solution would also be helpful for companies preparing

to file initial public offerings. Also, growing industrialization in developing regions and rising investment towards digitization across different industries are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, risk associated with System Crashes and high deployment cost associated with these software solutions impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Equity Management Software Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing Private equity and venture capitalist investment and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving growth of equity market and increasing penetration of leading software vendors in the region, would create lucrative growth prospects for the Equity Management Software Market across the Asia Pacific region.
