Global Ethyl Alcohol Market is valued approximately at USD XXX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2020-2027. Ethyl Alcohol is a volatile, flammable, colorless liquid with a slight characteristic odor. The compound is a principal active ingredient of alcoholic drinks. The rising consumption of alcohol across the globe drives the market for Ethyl Alcohol. Additionally, increasing efforts by the manufacturers to strengthen the distribution channels such as online stores and convenience stores aid the easy availability of the product fueling the market growth. As per the beverage Information and Insights Group, the straight American whiskey category grew 5.3% in 2018 reaching 23.29 million 9-liter cases in the US. While the Rose Category grew about 48% in the US and the Wine witnessed an overall growth of 3%. Further, the Indian Spirit sector including whiskey, brandy, rum and vodka was estimated to expand 25% to USD 41 trillion by 2022. Moreover, Extensive use of Ethyl Alcohol as a food processing ingredient in the food and beverage industry fuels the market growth as the compound is used as a natural product to extract and concentrate flavors and aromas used in wine production. However, rise in awareness about ill effects of alcohol consumption impedes the growth of the market over the forecast period of 2020-2027. Although, the increasing use of ethyl alcohol as renewable fuel which is used as fuel additive in automobiles to reduce harmful gas emission presents a lucrative opportunity for the market growth.

The regional analysis of global Ethyl Alcohol market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the Stringent regulations toward reducing the usage of fossil fuels, and rising demand from the food processing industry. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, rising alcohol consumption would create lucrative growth prospects for the Ethyl Alcohol market across Asia-Pacific region.
