Global Ethylene Glycol Market is estimated to valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Ethylene glycol (CH_2OH) is an organic compound that is a colorless, odorless, flammable, viscous liquid. It is majorly used as a raw material in the manufacture of polyester fibers and for antifreeze formulations. Factors such as the thriving growth of the automobile industry in emerging regions, rising application in textiles and PET, coupled with the increasing demand for polyester fibers and antifreeze formulations are bolstering the market demand across the globe.

The ethylene glycol is gaining huge prominence in automotive industry is owing to it has a lower freezing point compared to water and it helps in keeping the automobile radiator cool throughout the winter. According to the Indian Brand Equity Foundation, the Indian automotive industry is projected to reach USD 251.4- 282.8 billion by the year 2026. Therefore, the growth of the automotive industry is fueling the demand for Ethylene Glycol, which is surging the market growth. In addition, the increasing availability of improved ethylene glycol production technology and the growing popularity of bio-based ethylene glycol are creating lucrative opportunities for market growth over the forecasting years. However, fluctuations in the prices of raw materials and the imposition of stringent regulatory guidelines are hindering market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Ethylene Glycol Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North

America dominated the space in terms of revenue, owing to the growing need for increasing demand for MEG in polyester and PET from various end-use industries and the presence of leading market players. Whereas, the Asia Pacific is expected to grow significantly during the forecast period. Factors such as thriving growth of the packaging industry, as well as increasing demand from emerging textile and automotive industries, are burgeoning the market growth in the forecasting years.
