Abstracts

Global Exhaust Sensor Market for Automotive is valued approximately at USD 31.7 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6.15% over the forecast period 2019-2026. Exhaust sensors are the devices fitted in the exhaust outlet passage of vehicles for safety, emission control and driving control. These sensors are used in the exhaust system in order to monitor and control several factors pertaining to the pressure, temperature, exhaust matter particulate size and oxygen. Large population size in Asia-Pacific region, specially, countries such as India and China, which contributes to almost two-third population of the world, and the high disposable income of urban-based working youth in this region is expected to boost the automotive sales which will lead to the growth of automotive exhaust sensor market in the forecasted period. The stringent automotive emission rules followed in the Europe region are also expected to drive the market. The projected increase in demand of heavy commercial vehicles that use diesel as fuel will also contribute to the growth of the global exhaust sensor market. However, the complexity of the sensors used and the electronics in the vehicle is expected to curtail the market growth. Also, gradually, the replacement of internal combustion engine vehicles with electric vehicles will also hinder the growth of global exhaust sensor market for automotive industry.

The regional analysis of global Exhaust Sensor Market for Automotive is considered for
