Abstracts

Global Facial Fat Transfer Market is valued approximately USD 1.9 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 10.7% over the forecast period 2022-2028. Cosmetic surgery in which fat is moved from one place of the body to another is known as facial fat transfer. The need for facial fat transfer is expected to rise as the older population grows and cosmetic operations become more popular. The International Society for Aesthetic Plastic Surgery estimates that 10,607,227 cosmetic operations were performed worldwide in 2018. Furthermore, the number of surgeries using facial fat grafting is estimated to reach 542,305, accounting for around 5.1 percent of all cosmetic surgical procedures. Furthermore, according to the International Society of Aesthetic Plastic Surgery, about 24,529,875 cosmetic operations (including minimally invasive and surgical) would be performed in 2020. Liposuction and stomach tuck were two of the top five surgical treatments. Furthermore, saggy skin and wrinkles are always connected with ageing, which is usually caused by a loss of facial volume. According to the World Health Organization, over 125 million people aged 80 and up lived in 2018. As a result, demand for facial fat transfer is projected to rise. . Furthermore, in the forecasted period of 2022-2028, rising technological advancements and modernization in the production of paracetamol, rising research and development activities in the healthcare sector, and rising emerging markets with an increasing geriatric population base will create new opportunities for the facial fat transfer market. However, flaws in the technique that limit mass acceptance and uncertain regulations are among the primary reasons that would obstruct market expansion and will pose a further barrier to the growth of the Facial Fat Transfer Market over the projection period.

The key regions considered for the global Facial Fat Transfer Marketstudy includes Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the global market for face fat transfer, and this trend is likely to continue throughout the forecast period. This is due to a growing obese population, more R&D in the region, the highest per capita disposable income, increased use of new technologies, and regular public awareness efforts. Whereas, during the predicted period, the Latin American region is expected to grow rapidly. This is because nations like Brazil and Mexico have developed a reputation for providing high-quality aesthetic procedures at a lower cost.

Major market player included in this report are:

Ranfac Corp

Alma Lasers.

Allergan Plc.

Medikan International Inc

Genesis Biosystems

Emory Healthcare

Stanford Health Care

ANTHONY PRODUCTS, INC.

Cytori Therapeutics Inc.

DMS Biotech

The objective of the study is to define market sizes of different segments & countries in recent years and to forecast the values to the coming eight years. The report is designed to incorporate both qualitative and quantitative aspects of the industry within each of the regions and countries involved in the study. Furthermore, the report also caters the detailed information about the crucial aspects such as driving factors & challenges which will define the future growth of the market. Additionally, the report shall also incorporate available opportunities in micro markets for stakeholders to invest along with the detailed analysis of competitive landscape and product offerings of key players. The detailed segments and sub-segment of the market are explained below: ByDonor Site:

Thigh

Abdomen

Flank

By End-use:

Hospital

Clinics & Surgery Centers

By Region:
