Global FD And C Lakes Market is valued at approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. FD And C Lakes is color additive deemed to be safe and FDA-approved for use in foods, drugs, and cosmetics. When an FD&C color is followed by the word “lake,” it means the color has been mixed with a mineral (most commonly calcium or aluminum) to make the color insoluble (not affected by water). Also, with the being less expensive than other certified colourants, the adoption & demand for FD And C Lakes is likely to increase the market growth during the forecast period. However, government regulations impede the growth of the market over the forecast period of 2021-2027.
