Abstracts

Global Fertility Tourism Market is valued at approximately USD 0.417 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 30.0% over the forecast period 2022-2029. The practise of going to or visiting another nation for the purpose of treating a reproductive condition is known as fertility tourism.. The Fertility Tourism market is expanding because of factors such as the rise in accessibility and increasing proximity of healthcare facilities, increase in adoption of digital devices and rising reprotourism and the increasing cases of male and female infertility.

According to the World Health Organization, around 80 million couples worldwide, or 8% to 10% of all couples, suffer from infertility. Thus, high prevalence of infertility is catering to the growth of market. Furthermore, the market is anticipated to expand as a result of an increase in infertility cases, a rise in the trend of delayed pregnancies, and the quick adoption of medical tourism. The market is expanding as a result of improvements in assisted reproductive technologies, cost reductions, and extra perks for visitors like better healthcare, advanced equipment, first-rate hospitality, and personalised care. However, complications associated with the treatment may lead to hampering the growth of market.

The key regions considered for the Global Fertility Tourism Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Market dominance and revenue ownership were both held by North America. Over the anticipated time, the region is predicted to maintain the current pattern. The acceleration of government programs for launching fertility center and the expansion of research and development activities in the region.

Major market players included in this report are:

San Diego Fertility Center
