Abstracts

Global Feta Cheese Market is valued approximately at USD 11.1 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.7% over the forecast period 2021-2027. Feta Cheese is produced from sheep milk or a combination of goat milk and sheep milk. They provide number of essential nutrients such as protein, calcium, phosphorus, zinc, vitamins A & B12, and sodium in concentrated form to the human body. The global Feta Cheese market is being driven by growing health-conscious consumers as it contains very less carbohydrates. Another driving factor for the market growth is the increasing product launches by the companies to expand the market base.
