Global Fetal Monitoring Devices Market is valued approximately USD 1688.7 Million in 2019 and is anticipated to grow with a healthy growth rate of more than 6.80% over the forecast period 2019-2026. A fetal monitoring device is a fundamental device which is used for monitoring uterine contractions during labor. It is a diagnostic tool that is used to monitor the movement and the heart rate of the fetus and maternal contractions. It has prominent application in monitoring the health of unborn baby to ensure a safe birth and includes monitoring of chronic lung diseases, mental retardation, neonatal diseases, hypothermia, vision & hearing problems, and jaundice. The global burden of COVID-19 results in larger demand of fetal monitoring devices to monitor health of fetus and maternal contraction and ensure whether child is infected of corona or not. It has huge demand across the globe due to the prominent offering before the child birth, therefore the global rise in birth rates and preterm births is expected to drive the growth of market over the forecast years. For instance: as per Statista 2017, Nigeria accounts for the largest share in the fertility rate with over 6.49 children per women, followed by Angola, Mali, Burundi, Somalia that is 6.16, 6.01, 5.99, and 5.80 children per women, respectively. In addition, favorable government initiative for providing better healthcare facilities to pregnant women is expected to accelerate the growth of market over the

forecast years. However, high cost of equipment and stringent regulatory procedures associated with the use of Fetal monitoring devices is hampering the growth of market over the forthcoming period.

The regional analysis of global Fetal Monitoring Devices market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the presence of favorable government initiatives along with adoption of advanced technology in Fetal monitoring devices market. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2026. Factors such as rising birth rates and preterm births in the region would create lucrative growth prospects for the Fetal Monitoring Devices market across Asia-Pacific region.
