Abstracts

Global Fiber Optic Cable Assemblies Market is valued approximately at USD 2.9 billion in 2018 and is anticipated to grow with a CAGR of more than 7% over the forecast period 2019-2026. Fiber optic cable assemblies consist of an optical fiber, a reinforcement strand for support, and fiber optic cable connectors. It acts as a medium of data & electronic (A/V) signal transmission from one point to another in packets of optical energy or light and are designed to withstand harsh exterior environments ensuring greater durability. The fiber optic cable has characteristics such as assemblies are low-noise, distortion free signals, high transmission rate and bandwidth as well as they have light-weight property, low bulk form, immunity to electromagnetic field interference as compared to other cable types. The continued growth and investments made in internet and telecommunications industry as well as rising number of consumers demand for high quality video, audio and data transmission are the few factors responsible for higher growth of the market over the forecast period. For instance, according to Internet World Stats in 2018, 49% of total population in Asia uses internet, 85.2% in Europe, 36.1% in Africa and 95% in North America. Thus, rising internet penetration across various regions for data sharing is expected to fuel the

market growth. However, burgeoning aerospace and automotive sectors is the major factor opportunistic the growth of global Fiber Optic Cable Assemblies market during the forecast period.

The regional analysis of global Fiber Optic Cable Assemblies Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the rise in advancements in IoT and increase in the demand for internet and high-quality video and data transmission across the region. However, Asia-Pacific is anticipated to exhibit highest growth rate / CAGR over the forecast period of 2019-2026.
