Global FinTech Lending Market is valued approximately USD 573.05 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 27.4% over the forecast period 2022-2029. FinTech Lending also known as FinTech Lending is a type of lending procedure utilized by banking and non-banking financial organization to process loan online with the help of Fintech solutions. The financial institution uses digital channels for disbursement & collection of loan re payment. The application of Fintech solutions in lending automates the lending process and reduces overall turnaround time for loan disbursement. The increasing penetration of digital lending services and growing internet penetration in emerging markets as well as strategic initiatives from leading market players are key factors accelerating the market growth.

According to Statista – in 2019, the digital lending market in India was valued at USD 110 billion, and the market is projected to grow to USD 350 billion by end of 2023. Also, rising digitization in BFSI sector worldwide and growing emergence of AI & ML technologies would create lucrative growth prospectus for the market over the forecast period. associated with fintech lending impede the market growth throughout the forecast period of 2022-2029.
