Firearm lubricant refers to a highly refined petroleum-based lubricant. It differs from other oils/lubricants in its level of purity. Beyond lubrication, it also contains additives for the protection of the metal parts of a gun from corrosion and rust. Growing military & defense sector and rising demand for lubrication are key drivers for the growth of Firearm Lubricants market. For instance, according to global database management company Statista- As, of 2020, the total global demand for lubricants reached, to 37 million metric tons and by the year 2023, the worldwide lubricants demand is expected to reach 37.4 million metric tons. Also, with the increasing demand from end use industries and growing population and urbanization, the adoption & demand for Firearm Lubricants is likely to increase the market growth during the forecast period. However, negative environmental impact of lubricants impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Firearm Lubricants market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World.
