## **Abstracts**

Global Firefighting Foam Market is valued approximately USD 728.32 million in 2021 and is anticipated to grow with a healthy growth rate of more than 3.8 % over the forecast period 2022-2028. Firefighting foams are a combination of air, water, and concentrations that suppress fires by generating a layer that acts as a barrier between both the fuel/source and oxygen. The increasing fire-related incidents in industries, stringent rules and regulations regarding fire & safety, increasing awareness and emphasis on safety measures across the globe has led the adoption of Firefighting Foam across the forecast period. In addition, strategic initiatives by key market players are also boosting the market growth. For Instance: in April 2021, Johnson Controls launched Chemguard NFF 3?3 UL201 Foam Concentrate, which is a NFF technology that helps in suppressing polar and hydrocarbon fuel solvent. Also, upcoming technologies to mitigate current issues related to firefighting foam and development of fluorine-free foams are likely to offer lucrative growth opportunities during the forecasted period. However, firm regulations for production of firefighting foams impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Firefighting Foam market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the dominating region across the world in terms of market share and is also expected to
