## Abstracts

Global Fish Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XXX% over the forecast period 2022-2028. Fish is a prime source of essential fatty acids, vitamins, and minerals. Further, it is also acted as an essential source of amino acid, as it plays a critical role in balance of a healthy diet regime. Thus, increasing fish production & consumption of fish and rising preference for variety of dishes are factors contributing to the market growth. For instance: according to Statista, the global fish production went from 148.1 million metric tons, in the year 2010 to 174.6 million metric tons, in the year 2020. However, Shortage of labor impedes the growth of the market over the forecast period of 2022-2028. Also, Favorable government support and Various strategic initiatives by the private players is likely to increase the growth of the market in the forecasting period.

The regional analysis of global Fish market includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading region across the world in terms of market share owing to rising aquaculture production. Whereas, North America is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Rising demand for variety of fish in cuisine would create lucrative growth prospects for the Fish market across North America region.
