## **Abstracts**

Global Fixed Wing VTOL UAV Market is valued approximately at USD 0.59 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 19.7% over the forecast period 2021-2027. The fixed-wing vertical take-off and landing (VTOL) unmanned air vehicle is referred to as a fixed-wing VTOL UAV (UAV). They are generally referred to as drones and are capable of operating independently without the need for a human operator. With the aid of rotors, a fixed-wing VTOL UAV can hover, take-off, and land vertically like a helicopter. The vehicle is primarily built for low take-off weight and great aerodynamic performance. The center of gravity placement in relation to the neutral point is used to determine aerodynamic design stages and wing and static stability sizes. Increasing use of advanced patrolling of marine borders and growing use of Fixed-Wing VTOL UAVs to counter terrorism are factors driving the market demand for Fixed wing VTOL UAV. Furthermore, the growing usage of fixed-wing VTOL UAVs to counter psychological oppression is driving market growth. Future technical developments will lead to eVTOLs, which will boost market expansion in the forecast future. Increased demand for VTOL UAVs has led to the key companies focusing their efforts on the VTOL UAV market. For instance, Larsen & Toubro (L&T) and ideaForge

signed a deal in 2020 to provide allied systems and drones for defence purposes. Both firms joined their resources to develop high-tech drone systems for surveillance and security. However, possible threats to safety and violation of privacy may impede market growth over the forecast period of 2021-2027.

Geographically, North America is expected to dominate the market, followed by Asia Pacific and Europe. This is due to the increasing demand for fixed-wing VTOL UAVs in the United States, which are used for various applications including firefighting and disaster management, marine security, agricultural, product delivery, inspection and monitoring, and more.
