Global Flame Retardants Market for Engineering Resins Market is valued approximately at USD 1.59 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 7.3% over the forecast period 2021-2027. Global Flame Retardants Market for Engineering Resins is a type of diverse group of chemicals that are added for manufacturing materials, such as plastics, textiles surface finishes etc. The global Flame Retardants market for engineering Resins market is being driven by increase in number of fire incidents as well as strict fire safety guidelines and the huge demand for engineering plastics in various industries. Furthermore, introduction of more effective synergist compounds and rising demand for consumer electronics worldwide, will provide new opportunities for the global Flame Retardants Market for Engineering Resins industry. For instance, According to the national fire protection association in 2019, in United states in every 93 seconds, a new home fire was reported due to which a home fire death recorded in every 3 hours and home fire injured occur in every 43 minutes. As a result, increased incidences of fire will serve as a catalyst for the Flame Retardants industry in the future. However, high loading levels of mineral-based flame retardants as well as harmful chemicals used in flame retardants may impede market growth over the forecast period of 2021-2027.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are the key regions considered for the regional analysis of Flame Retardants Market for

Engineering Resins market. The Stringent and increasing environmental regulations and strict standards set by other regulatory authorities make North America the leading region across the world in terms of market share. Whereas Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to increasing demand for flame retardants market for engineering resins applications in the region.
