Abstracts

Global Flexitank Market is valued approximately at USD 717.4 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 20.8% over the forecast period 2021-2027. Flexitanks is an alternative to ISO tanks which offer various types of containers for shipping of various liquids such as oils, wines juices, food-grade liquids etc. The global Flexitank market is being driven by growth in trade of wine across the world and flexitanks' competitive edge over other alternatives. Furthermore, rise in trade of commodity in BRICS Nations, and new configuration in flexitanks will provide new opportunities for the global Flexitank industry. For instance, according to Statista, the value of wine exported from the United Kingdom region is rising year on year; in year 2017, the export value reached USD 77.17 million and increased to USD 90.28 million in year 2019. As a result, increased export of wine will serve as a catalyst for the Flexitank industry in the future. However, availability of low-quality flexitanks and containers may impede market growth over the forecast period of 2021-2027.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are the key regions considered for the regional analysis of global flexitanks market. The presence of huge wine exporting industry across the region makes Asia Pacific the leading region across the world in terms of market share. Whereas Europe is also anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to increase in production and export of temperature-sensitive pharmaceuticals in the region.
