## Abstracts

Global Floral Extract Market is valued approximately at USD 2.2 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.3 % over the forecast period 2022-2028. Floral Extract is a non-toxic extract of the daisy flower often used to brighten skin and prevent hyperpigmentation. The extract provides antiseptic properties that can remove bacteria from the surface of the skin, keeping it healthy. The rising health & environment concern and growing demand for natural products has led the adoption of Floral Extract across the forecast period. Conscious about the health and skin there is rise in demand of organic products. For Instance: as per the World Health Organization (WHO) thirteen million deaths annually are attributable to preventable environmental causes, the report estimates that 24% of the Global disease burden (healthy life years lost) and 23% of all deaths (premature mortality) are attributable to environmental factors, with the environmental burden of diseases being 15 times higher in developing countries than in developed countries, due to differences in exposure to environmental risks and access to health care and Global sales of organic food have increased between 2000 and 2019. In 2019, sales of organic food amounted to 106 billion U.S. dollars, up from nearly 18 billion dollars in 2000. Also, with the growing popularity of natural products and rising demand for organic cosmetics, the adoption & demand for Floral Extract is likely to increase the market growth during the forecast period. However, expensive products costs and barrier to cross-border commodity transportation impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Floral Extract Market study includes Asia

Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the changing lifestyle, consumption pattern and rising demand for organic cosmetics. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as urbanization, increased incomes, sprung in number of working women, and growing importance of men grooming products would create lucrative growth prospects for the Floral Extract Market across Asia-Pacific region.
