Abstracts

Global Flow Meter Market is valued approximately at USD 8.29 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 5.7% over the forecast period 2021-2027. New product launch complemented with technological development by prominent players, increasing adoption in sectors such as oil and gas, water and waste water treatment and others are the factors contributing to the growth of market demand. For instance, in January 2020, Emerson Electric Corporation launched Micro Motion™ Coriolis flow meter. The product is designed for chemical injection and high-pressure hydrogen dispensing applications where measurement accuracy and safety are essential. Furthermore, increase in adoption of IoT sensors for smart metering solutions are expected to drive the market in coming years. However, high cost of flow measurement infrastructure is expected to hamper the market growth during the forecast period.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are the regions taken into consideration for the regional analysis of the global Flow Meter Market. Europe is the dominating region across the world in terms of market share due to high adoption of flow meters in power generation sector. Whereas Asia Pacific is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to rising investment in water & wastewater, energy and power, refining, chemicals, and

industrial infrastructure activities in the countries such as China and India.
