Global Foamed Plastics Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Foamed plastic refers to a type of resin that has been frothed with air bubbles. On solidification, the plastic shapes in a sponge-like structure which can be controlled for softness or rigidity. Plastics that are commonly foamed include vinyl's, polystyrene, polyethylene, phenolics, silicones, cellulose acetate, and urethanes. Foams are used in a number of applications such as helmets, packaging materials. Growing Logistics and Transportation industry and rising food packaging Market are key drivers for the growth of Foamed Plastics market. For instance, according to India Brand Equity Forum (IBEF)- In Union Budget 2021, the government of India has allocated USD 32.02 billion to enhance the transport infrastructure. Furthermore, the government expanded the 'National Infrastructure Pipeline (NIP)' to 7,400 projects worth USD 15.09 billion were completed as of 2020. Through the NIP, the government invested USD 1.4 trillion in infrastructure development as of July 2021 and as per global database Management Company Statista- In 2019, the global rail freight traffic was estimated at 9.3 trillion-ton kilometers and is expected to reach roughly 12 trillion-ton kilometers by the year 2025. In April 2020, JSP launched new polymer Foam. The new polymer grade, 'Arpro 35 Ocean', is made with 15 per cent recycled maritime industry waste recovered from fishing nets and ropes. Also, with the emergence of e-commerce and

logistics services and rapid urbanization in emerging markets, the adoption & demand for Foamed Plastics is likely to increase the market growth during the forecast period. However, volatility of raw material prices and growing concern over foamed plastic pollution impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Foamed Plastics Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing logistics and transportation sector in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028.
