Global Food Emulsifiers Market is valued approximately USD 3.1 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.7 % over the forecast period 2020-2027. Food Emulsifiers helps to stabilize emulsions and smoothness in food & beverage production processes. Food emulsions provide elasticity and smoothness, also improves quality, utilized for the production of instant noodles, fresh noodles, macaroni and spaghetti. The global Food Emulsifiers is facing challenges due to the coronavirus pandemic as manufacturing sectors are temporary shutdown. But various manufactures are taking opportunity while providing high quality of ingredients and products for consumers and also focuses more on maintaining strong relationship with the value chain stakeholders. As consumers are ready to pay higher amount for better quality of food & beverages. The growing consumption of convenience foods and

premium products and rising number of end-use applications due to multifunctional attributes of emulsifiers are the few factors responsible for growth of the market over the forecast period. Furthermore, the rising advancements and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 16th August 2018, DuPont Nutrition & Health launched monoglyceride emulsifier called Dimodan HP 90-M. A new naturally-sourced, beaded monoglyceride, Dimodan HP 90-M emulsifier is made from sustainable palm oil, and is used for a wide range of applications including the production of margarine, non-dairy creamers and whipping gels. However, limited extraction and additional costs associated with emulsifiers extracted from natural resources is the major factor restraining the growth of global Food Emulsifiers market during the forecast period.

The regional analysis of global Food Emulsifiers market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world owing to the growing adoption of food emulsifiers and other food processing ingredients. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
