Abstracts

Global Food Flavors Market is valued approximately USD 15.6 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.8 % over the forecast period 2020-2027. Food flavors are used to improve the taste of food products, includes natural and synthesized flavors. The food flavors are used in food & beverage industry for different purposes such as new product development, add new product line, and change the taste of existing product. The global Food Flavors market is facing challenges due to the coronavirus pandemic as governments temporary shut-down restaurants and bars to reduce the spread of the virus. The growing demand for processed and comfort food as well as the increased consumption of confectionery items, are few factors responsible for the growth of the food flavor market. Along with the advancement of new technologies and innovative experiments in the food & beverage sector, further increases the demand of the market over the forecast period. Furthermore, the rising advancements and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 16th December 2019, Dupont and International Flavors & Fragrances Inc (IFF) agreed into a merger to create a new industry for food & beverage industry worth USD 45 billion. However, side-effects of added flavors, both natural and synthetic and stringent regulations and government policies are the major factors restraining the growth of global Food Flavors market during the forecast period.

The regional analysis of global Food Flavors market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world owing to the high production of processed food. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
