Abstracts

Global Food Grade Gelatin Market is valued at approximately USD 1.58 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 3.88 % over the forecast period 2021-2027. Gelatins are increasingly being used as dietary supplements because they are a highly bioactive form of collagen that triggers the creation and reorganization of new collagen fibers, hence supporting tissue structure. The foundation of the collagen supplement market is due to the numerous health benefit of gelatin. Hydrolyzed gelatin is increasingly being utilized in nutritional supplements because the finished product has a low molecular weight, making it easier for the body to digest, absorb, and distribute amino acids throughout the body. Furthermore, as people become more aware of the benefits of gelatin, manufacturers are investing in scientific research and doing extensive preclinical and clinical research to investigate the link between nutrition and bone health. Innovative gelatin products to improve bone density are being created based on this research to meet expanding consumer demand. The major players have a broad geographic reach, and their products are increasingly being used in a variety of industries, including food and beverage, confectionery, dietary supplements, and others. Consumer demand is increasing, thus new products are being developed to meet it. For instance, in December 2020, SelJel, a Turkish gelatine manufacturer, has been bought by Gelita AG. Gelita AG is bolstering its position as the industry's global leader with this joint venture. Similarly, in June 2021, Nitta Gelatin India launched premium gelatin of world level. Food enthusiasts may now prepare and enjoy a wide range of desserts, jellies, frozen sweets, soft candies, and marshmallows that meet international standards. However, rising prices and lower availability of raw materials may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Food Grade Gelatin Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). Europe is the leading region across the world in terms of market share due to Enhanced consumption of gelatin, as a functional and low-calorie diet alternative in the region. Whereas North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to growing popularity of gelatin-based products across various application across the region.
