Abstracts

Global Food and Beverage Industry Pumps Market is valued at approximately USD 9.4 Billion in 2021 and is anticipated to grow with a healthy growth rate of more than 5.3% over the forecast period 2022-2028. Food producers are placing more of a concentrate on high production, quick turnaround, and low costs of production. Integrating cutting-edge pump techniques enables this. The form of the food material being processed has a significant impact on the type of pumps used, as some food and beverage industry pumps are better suited for one form over another. Meat consumption and production remain high, particularly in developed countries. Demand for meat and poultry products is expected to rise in developed countries such as the United States, owing to factors such as lower beef, pork, and poultry prices, a greater emphasis on improving quality, shelf life and safety of meat products and rising per

capita meat consumption. Because of the growing meat and poultry industries, meat and poultry-related pumps are expected to offer significant potential. The year 2018 'is expected to present a good perspective for the pork industry as the number of pork processing plants is expected to expand, which is expected to drive pork output further,' according to a USDA Economic Research Service article on Food Price Outlook, 2018. SIG, a leading solution and system provider for aseptic packaging, will collaborate with SPX to open a technology centre at the Dubai Silicon Oasis in November 2021. Alfa Laval acquired LiftUP in Norway in October 2021. This acquisition aided in the expansion of Alfa Laval's aquaculture portfolio. However, cavitation effect in industrial pumps is expected to hamper the market growth.

The key regions considered for the global Food and Beverage Industry Pumps market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Europe accounted for a significant market share during the forecast period due to the established processed food & beverage industry. Asia Pacific is the dominant food and beverage market, and it is expected to be the largest for food and beverage industry pumps. Rising income and purchasing power, rapid middle-class population growth, and rising consumer demand for processed foods all point to promising prospects for growth and diversification in the region's food sector.
