Abstracts

Global Food Safety Testing Market is valued approximately at USD 19.4 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 7.7% over the forecast period 2020-2026. Food safety testing refers to the inspection or examination of food products for disease-causing organisms, chemicals, and other hazardous materials. It is generally targeted at three primary food contaminants namely, chemicals, pathogens, and genetically modified organisms (GMOs). Food Safety testing is used to analyze the food frauds. Food fraud is committed when food is deliberately altered for financial gains with the intention of deceiving consumers. The food standards agency (FSA) specifies two main types of food frauds namely, sale of food that is unfit and potentially harmful and deliberate misdescription of food. The implementation of stringent regulations related to food fraud, changing consumption patterns and widespread outbreaks of food-borne illnesses is the factor responsible for growth of the market over the forecast period. Furthermore, the introducing new products and services as well as other strategic alliances by market key player will create a lucrative demand for this market. For instance: as per Company's news release in July 2019, SGS SA launched new 'Product Recalls' digital platform – an at-a-glance, online database that gives consumer goods manufacturers and retailers instant access to the

latest unsafe product notifications (non-food) from the EU and USA. However, lack of food control infrastructure in the developing economies is the major factor restraining the growth of global Food Safety Testing market during the forecast period.

The regional analysis of global Food Safety Testing market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading/significant region across the world due to the enforcement of stringent regulatory norms in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2026.
