Global Food Vacuum Machine Market is valued approximately USD 12.3 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 5.0 % over the forecast period 2020-2027. Food Vacuum machines involves drawing air out of the package and then sealing the food product in an impermeable package. Food Vacuum Machine removes air from the product package to increase the product shelf-life and is readily used by shops, hypermarkets, supermarkets, etc. The Covid-129 pandemic impacts the global food vacuum machine market due to temporary shutdown of restaurants and supermarkets. However, increasing focus on hygienic packaging

solutions with the advent of COVID-19 will encourage the demand of food vacuum machines. The growing demand for shelf-stable products, rise in the usage of RTE (ready-to-eat) food and growing awareness to minimize food wastage and need to preserve food are the factors responsible for the growth of the global Food Vacuum Machine Market over the forecast period. Furthermore, the rising advancements and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 29th August 2018, Porseal launched TTE tray sealer for low volume production and production trials. These tray sealing machine has full vacuum facility which is capable of sealing can seal up to 10 vacuum packs per minute with two impression tools. However, depreciating packaging capability of food vacuum machines and high installation and maintenance cost of machines are is the major factor restraining the growth of global Food Vacuum Machine market during the forecast period.

The regional analysis of global Food Vacuum Machine Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world in terms of market share owing to the rising disposable income of consumers, which has resulted in an increased expenditure in packaged and ready-to-eat food.
