Abstracts

Global Forensic Imaging Market is valued approximately USD 62.54 million in 2020 and is anticipated to grow with a healthy growth rate of more than 10.5 % over the forecast period 2021-2027. Forensic Imaging is a bit-by-bit, sector-by-sector direct copy of a physical storage device, including all files, folders and unallocated, free and slack space. Forensic images include not only all the files visible to the operating system but also deleted files and pieces of files left in the slack and free space. Growing awareness regarding the value of virtual autopsy, Non-invasive nature, increasing global crime rate, lack of human resources has led the adoption of Forensic Imaging, the forecast period. Non-invasive nature is being prompted as it does not hurt the sentiments of the several communities as compared to Conventional autopsy. For Instance: as per the Statista report, in 2020, North America region, Mexico had the highest murder rate of any city in the world, with 111.3 murders per 100,000 population. In the Asia-Pacific region, Pakistan and Japan have incredibly low incarceration rates by comparison, with around 40 per 100,000 population respectively in 2017.. However, Legitimacy, rise of antiforensics techniques, Privacy issue impedes the growth of the market over the forecast period of 2020-2027. Also, with the increasing technology advancement the adoption & demand for Forensic Imaging is likely to increase the market growth during the forecast period.

The regional analysis of global Forensic Imaging market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the significant region across the world in terms of market share owing to increasing crime rate and technology advancement. Whereas, Asia-Pacific is

also anticipated to exhibit highest growth rate over the forecast period 2020-2027. Factors such as increase in population rate, and rising awareness to know the death cause would create lucrative growth prospects for the Forensic Imaging market across Asia-Pacific region.
