Abstracts

Global Formulation Development Outsourcing Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Formulation development is a method of determining the lifecycle, patentability, and accomplishment of the pharmaceutical product. This process includes pre-formulation such as excipient screening to stabilize, analytical assay development & characterization. Formulation development outsourcing provides a wide range of benefits, such as accessing expertise, compressing timelines, and giving extra insurance against product failure. The thriving growth of the pharmaceutical & biotechnology sector, increasing cost-effectiveness of formulation outsourcing services, and the growing trend of patent protection expiration of major drugs are the primary factors impelling the global market demand. For instance, according to the Indian Brand Equity Foundation (IBEF), in India, the pharmaceutical market was estimated to be worth around USD 42 billion in 2021. Also, it is anticipated that the market progressively grows and reach nearly 130 billion by 2030. Accordingly, the flourishing development of the pharmaceutical sector is excelling the growth of the market around the world. However, structural changes in the pharmaceutical industry and insufficient funding to perform the drug development process through formulation development impede the growth of the market over the forecast period of 2022-2028. Also, the rising R&D spending and substantial development of the emerging markets are anticipated to act as catalyzing factors for the market demand during the forecast

period.

The key regions considered for the global Formulation Development Outsourcing Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the rapid adoption of novel technologies, and the presence of various prominent market players. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the growing investments in research and development activities, and the growth of various emerging markets such as South Korea, India, Japan, and China would create lucrative growth prospects for the Formulation Development Outsourcing Market across the Asia-Pacific region.
